Past Meetings

MAY: USC Aiken Survey Results showing interest in the community for an OSH Degree Program. USC Aiken will continue efforts towards this goal. 

SEP: OSHA Update Summary of the Fall Agenda 

OCT: Indoor Air Quality This was an informative and interactive discussion lead by Mark Schweder detailing investigation methods to solve Indoor Air Quality issues.

NOV: Local Emergency Planning Committee (LEPC) Workshop This workshop was packed with energetic speakers talking about everything from Cyber Security to Risk Homeostasis. 

Presidents Message

The 20's are here again. It was over a hundred years ago that the ASSP group formed to protect workers. Looking at photos of the past, Iron worker walking on steel beam without fall protection, hundreds of feet in the air, are unheard of today. Safety in the workplace has changed and will continue to change.

But for now, we need to learn the available best practices that we can incorporate in our workplaces with the fundamental goal of ensuring that everyone goes home in the same condition as they arrived. As we start our first meeting of the year, make a resolution that you can keep that is, committing to getting involved with your ASSP chapter and making new connections.

-James Charlton
